DETAILED ACTION

Drawings

New corrected drawings are required in this application because the drawings filed on the application are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: After careful consideration of the Applicant's remarks the Examiner has found the independent claim is allowable. There is no evidence in the prior art of a prosthetic device comprising a sleeve having an inner passageway with at least one channel located on the periphery of the passageway, a rod comprising an elongated shank extending between a proximal end and a narrow distal end, with at least a portion of the shank having at least one lobe extending therefrom, wherein the rod component is inserted through the sleeve and the interaction between the lobe of the shank of the rod component and the channel within the sleeve allow small rotation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
